Commercial Appliance Function Check from Vaillant

What is an Appliance Function Check?

An Appliance Function Check (or AFC) is a site visit from a Vaillant commercial engineer to confirm the appliance is installed and functioning to its manufacturer's specification. Giving the installer the peace of mind of trouble-free operation and the best possible efficiency for the end customer.

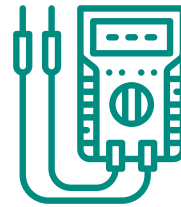

These checks include:

VISUAL

PERFORMANCE

ELECTRICAL
CHECKS

PROFESSIONAL
ADVICE

How can my business benefit from an Appliance Function Check for commercial appliances?

Learn through guidance

On site expertise by a Vaillant specialist providing guidance and best practice for the installation of Vaillant commercial systems.

Documentation

Our specialists document important information and systems settings. We then send these to you and the end customer for future reference.

Connectivity

Connecting a Vaillant commercial appliance via an internet gateway enables remote access, programming and diagnosis. *

* This is an additional service. Please contact Vaillant for costing and availability.

What's included in a commercial AFC

Our AFC's are recommended for your first install and include:

- Full visual checks
- Performance checks
- Gas safety checks
- Flue system inspection
- Test electrical connections
- Professional advice on system set up and product use
- Ventilation checks are also carried out if applicable

What's not included in a commercial AFC

- Specification (service available through Vaillant's System Sales and Design team)
- Installation
- Test and purge of fuel lines
- Flue certification
- Full system commission
- Set up and commissioning of 3rd party equipment
- Controls set up*

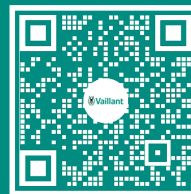

* This is an additional service. Please contact Vaillant for costing and availability.
