

Heat Pump Appliance Function Checks from Vaillant

What is an Appliance Function Check?

An Appliance Function Check (or AFC) is a site visit from a Vaillant heat pump engineer to confirm the appliance is installed and functioning to its manufacturer's specification. Giving the installer the peace of mind of trouble-free operation and the best possible efficiency for the end customer.

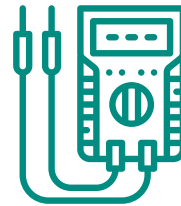

These checks include:

VISUAL

PERFORMANCE

SYSTEM AND
ELECTRICAL CHECKS

PROFESSIONAL
ADVICE

How can my business benefit from an Appliance Function Check for heat pumps?

Learn through guidance

On site expertise by a Vaillant specialist providing guidance and best practice for the installation of Vaillant heat pump systems.

Documentation

Our specialists document important information and systems settings. We then send these to you and the end customer for future reference.

Connectivity

Connecting a heat pump via an internet gateway enables remote access, programming and diagnosis.*

Extended guarantee

Extended guarantee packages available to give yourself and the end customer peace of mind.

* This is an additional service. Please contact Vaillant for costing and availability.

What's included in a heat pump AFC?

Our AFC's are recommended for your first install and include:

- Full visual checks
- Temperature checks
- System checks (visual system check)
- Test for leaks
- Test electrical circuits
- Professional advice on system set up and product use

A full detailed description and pricing for our renewable support options are available through contacting our Renewables Support Team.

What's not included in a heat pump AFC?

- Specification (service available through Vaillant's System Sales and Design team)
- Installation
- Full system commission
- Set up and commissioning of 3rd party equipment

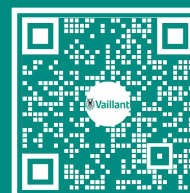

Heat pump AFC prices

Non-London		London	
Excl. VAT	Incl. VAT	Excl. VAT	Incl. VAT
£250	£300	£291.67	£350

Please note: if an appliance function check visit cannot be completed because the installation is incomplete or at fault, then an additional aborted call charge will be applied.

Prices subject to change.

For cascade heat pumps, please contact your local Regional Business Manager for further information.
