Introducing our new sensoHOME and sensoCOMFORT controls

 **Vaillant** Comfort for your home

# Simply beautiful

## Our new range of senso controls

Vaillant sensoHOME and sensoCOMFORT controls have been designed with simplicity in mind. Precisely engineered to communicate seamlessly with your Vaillant heating appliance, senso controls allow your home heating system to deliver your heating and hot water in the most efficient and effective way possible. With an elegant, sleek design, and a user-friendly touch interface, senso controls help you to create your perfect home comfort zone.

sensoCOMFORT

## The benefits of senso controls

Rather than simply turning your boiler on or off, Vaillant senso controls use our eBUS software with load compensation technology to determine the precise amount of energy required to raise room temperatures to the desired level. Whenever possible, senso will control your Vaillant heating appliance to work at a reduced output – conserving energy and saving you money.

### Stylish design

Sleek, elegant and stylish, senso controls have been designed to complement all modern interiors.

### Intuitive operation

An easy-to-use touch interface provides precise, effortless control over your complete heating system.

### Peace of mind

Senso controls can monitor and display your energy usage\*, and notify you of any system faults or service reminders.

\*sensoNET Internet Gateway (VR 921) required.

## Take control from anywhere

The sensoAPP\* allows you to control your heating and hot water anytime, from anywhere. If you're going to be late home, delay your heating from coming on so you're not heating an empty house.

\*sensoNET Internet Gateway (VR 921) required.

# sensoHOME

Vaillant sensoHOME has been designed to control the heating system of the typical family home with one single heating zone. Available in wired and wireless options.

## Load compensation technology

Determines the precise amount of energy required to achieve the desired temperature, saving you money.

## Take control from anywhere

The sensoAPP provides a detailed understanding of your energy usage and heating behaviour.

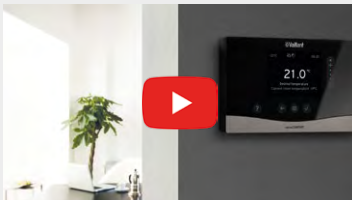

## Range of programs

sensoHOME has programming options for seven days, weekdays and weekends, or 24-hour time periods.

## Flexible control

The simple menu and override functions allow you to quickly boost the heating and hot water whenever you need.

## See senso for yourself

Watch our how-to videos to understand how sensoHOME or sensoCOMFORT could work in your home. Scan the QR code to find out more information.

sensoHOME

sensoCOMFORT

# sensoCOMFORT

Vaillant sensoCOMFORT is designed for more complex home heating systems, with features to support multizone, hybrid, and renewable systems. Available in wired and wireless options, sensoCOMFORT is our ultimate system control.

## Load compensation technology

Determines the precise amount of energy required to achieve the desired temperature, saving you money.

## Take control from anywhere

The sensoAPP provides a detailed understanding of your energy usage and heating behaviour.

## Room-by-room control

When used with ambiSENSE\* wireless thermostatic radiator valves, sensoCOMFORT lets you adjust the temperature and timings for individual rooms.

## Change with the season

Weather compensation technology monitors the conditions outside and tells your boiler how hard to work to achieve the right temperature, without wasting energy to get there.

## Smart efficiency

When used on a hybrid system, sensoCOMFORT uses triVAL technology to automatically select the most efficient and cost effective heating method.

\*sensoNET Internet Gateway (VR 921) required.

**VALLFTB2CSHSC0520**

It's fair to say that the terminology of heating controls and thermostats can be complex and sometimes confusing. This is why we always advise contacting a qualified heating engineer.

Finding a heating engineer near you couldn't be easier. Simply search at [vaillant.co.uk/findaninstaller](http://vaillant.co.uk/findaninstaller)

**Why choose a Vaillant Advance installer?**

Advance is Vaillant's installer loyalty scheme. By choosing an Advance Installer, you're choosing from our network of Gas Safe registered, independent installers who can offer you exclusive extended guarantees, as well as a free, no obligation quote to ensure your Vaillant product is the perfect fit for you and your home.
