

VRT 15 room thermostat

The VRT 15 is a traditional room thermostat with a familiar and easy-to-use mechanical dial. The dial is used to set and display the room temperature, which can be between 8 - 30°C. The interface features a Braille indicator, positioned at 20°C so it's easy to find.

This thermostat is easy to install; only a two-core 230Vac connection is required, and it can often be installed using existing cable.

To control heating and hot water time programs the VRT 15 can also be installed with a timeSWITCH 160.

Note: these traditional controls should always be used together and are suitable for open vent and system boilers only. Used together, the VRT 15 and timeSWITCH 160 controls comply with Boiler Plus legislation.

Key features and benefits

- **Built with familiarity in mind**
The VRT 15 is designed to be easy-to-use and feel familiar
- **Clear display of the desired temperature**
Clear mechanical dial to set and display requested temperature
- **Wide range of temperatures for your comfort**
The room temperature can be adjusted between 8 - 30°C

- **Braille temperature indication**
Braille indicator to make the position of 20°C easy to find
- **Simple installation often utilising existing cable**
Two core 230Vac wired connection for simplicity

Technical data	Unit of measure	VRT 15
Article number		306777
Height	mm	83
Width	mm	83
Depth	mm	33
Power supply		230Vac
Minimum cross-section of the eBUS and sensor wire	mm ²	0.75
Current consumption	A	10 (2.5)
Level of protection		IP30
Adjustable temperature range	°C	8 - 30

I would like to...

Control a system or open vent boiler with one wired heating zone with a digital plug-in timer and a wired mechanical room thermostat
