

ecoCRAFT 80kW, 120kW & 160kW

Floor standing condensing boiler range

Technical specification

- The ecoCRAFT range consists of six models including 80kW, 120kW, 160kW, 200kW, 240kW and 280kW
- Modulation ranges as wide as 17% to 100%
- Modular heat exchanger design utilising a single pre-mix burner and fan to achieve part load efficiencies as high as 108.4% (net)
- NOx class 5 rating
- Adjustable maximum flow temperature from 35°C to 85°C
- ErP band A

Water quality - To maintain boiler performance and life, ensure all system water remains free of debris and is treated to manage hardness and corrosion by use of inhibitors throughout the boiler life. Omissions could lead to failures that are not covered by our guarantee. See website for full terms and conditions.

Recommended minimum distances for installation.

Once installed it is not necessary to ensure a particular clearance between the boiler and combustible materials or components as the boiler will always be less than 65°C at its rated heating output. It is recommended that a minimum of 500mm clearance is provided in front of the boiler to ensure easy access for servicing.
