

PLEASE NOTE
THE STEP BY STEP GUIDE IS NOT INTENDED TO REPLACE THE INSTALLATION LITERATURE. IT SHOULD BE USED ONLY AS A REFERENCE.

- Note: Before securing the wall hanging bracket the following considerations must be made:
1. Rear or Turret flue (see Step 2)
 2. Position of boiler
 3. Hole for flue.

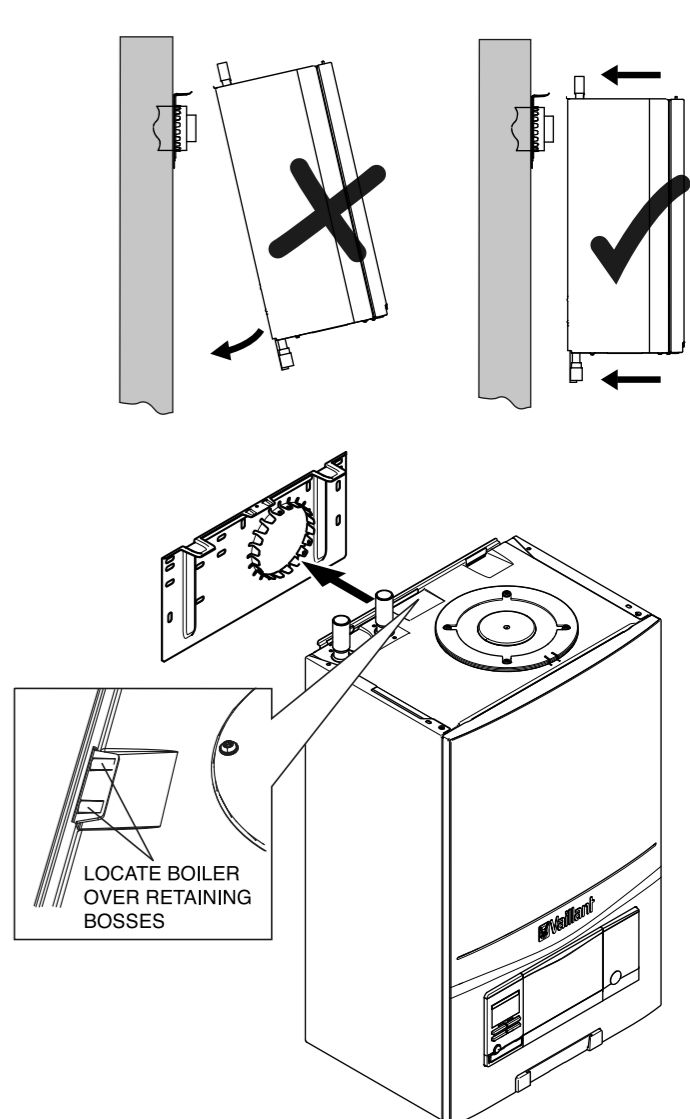

Step 1

Note: If external access is not available for rear flue installation, then it must be assembled and inserted into the hole before securing the wall hanging bracket.

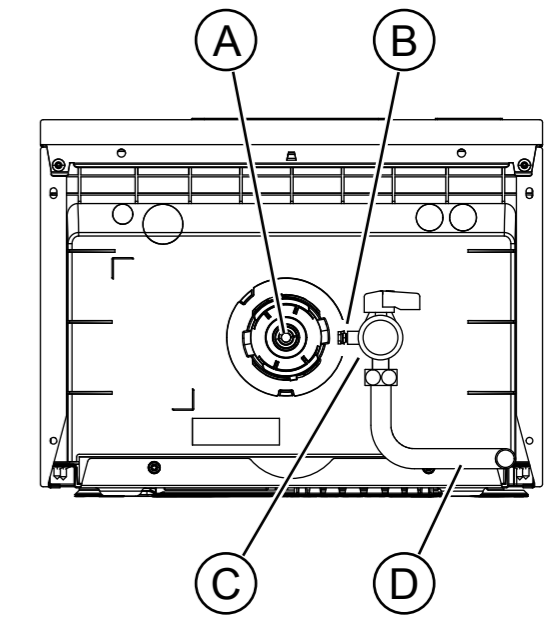

Step 2

Note: Direct Rear Flue
The flue must be installed and secured and the rear cover plate removed before hanging the boiler.

Step 3

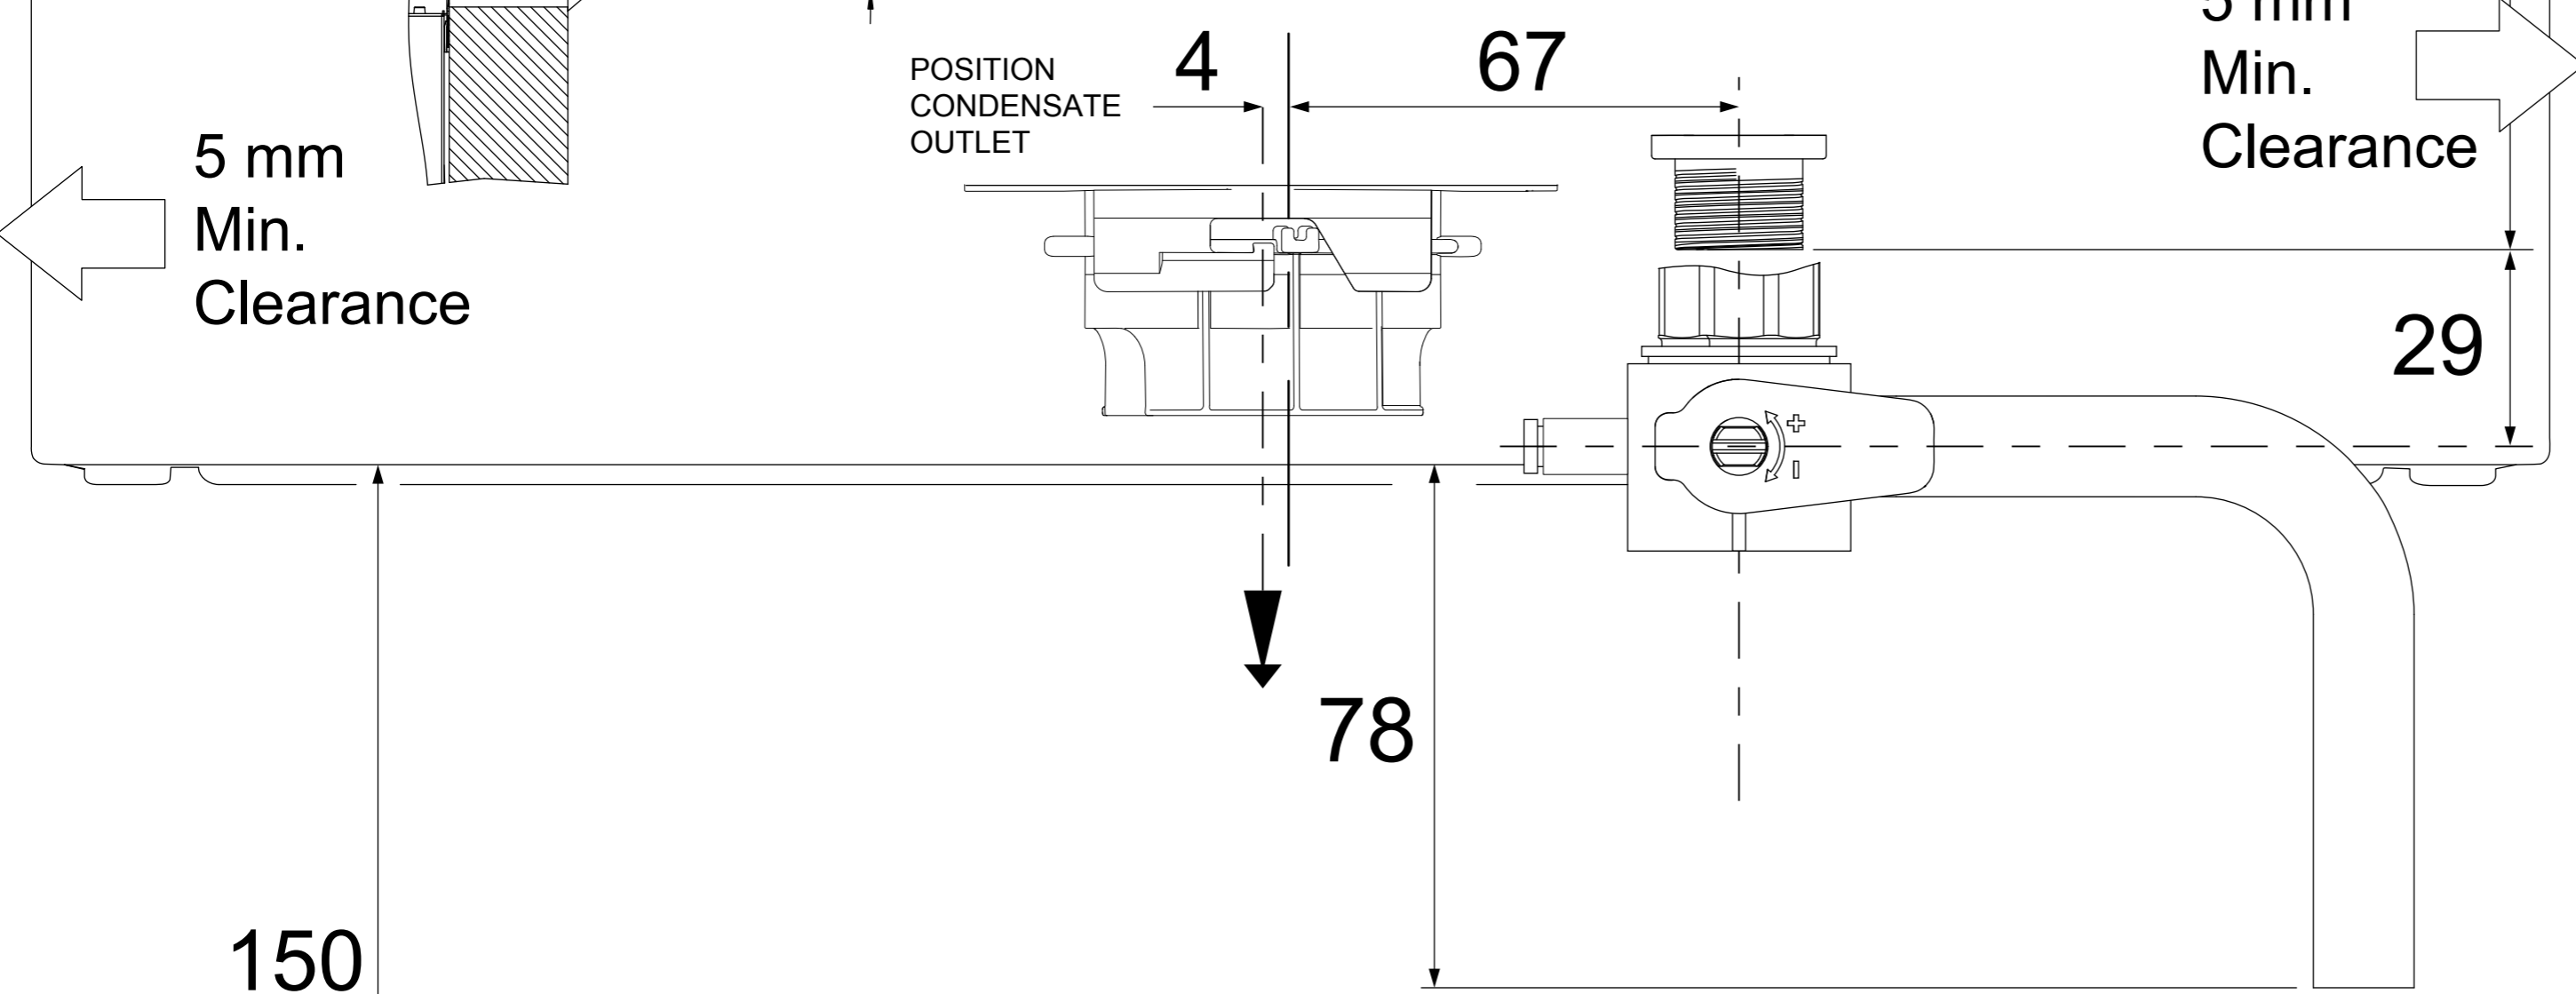

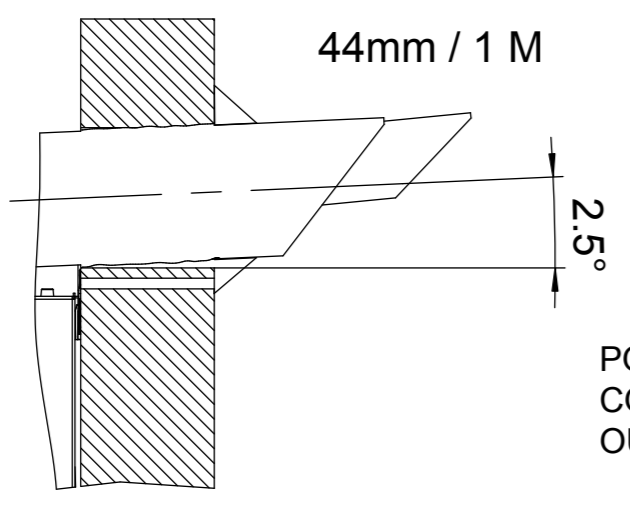

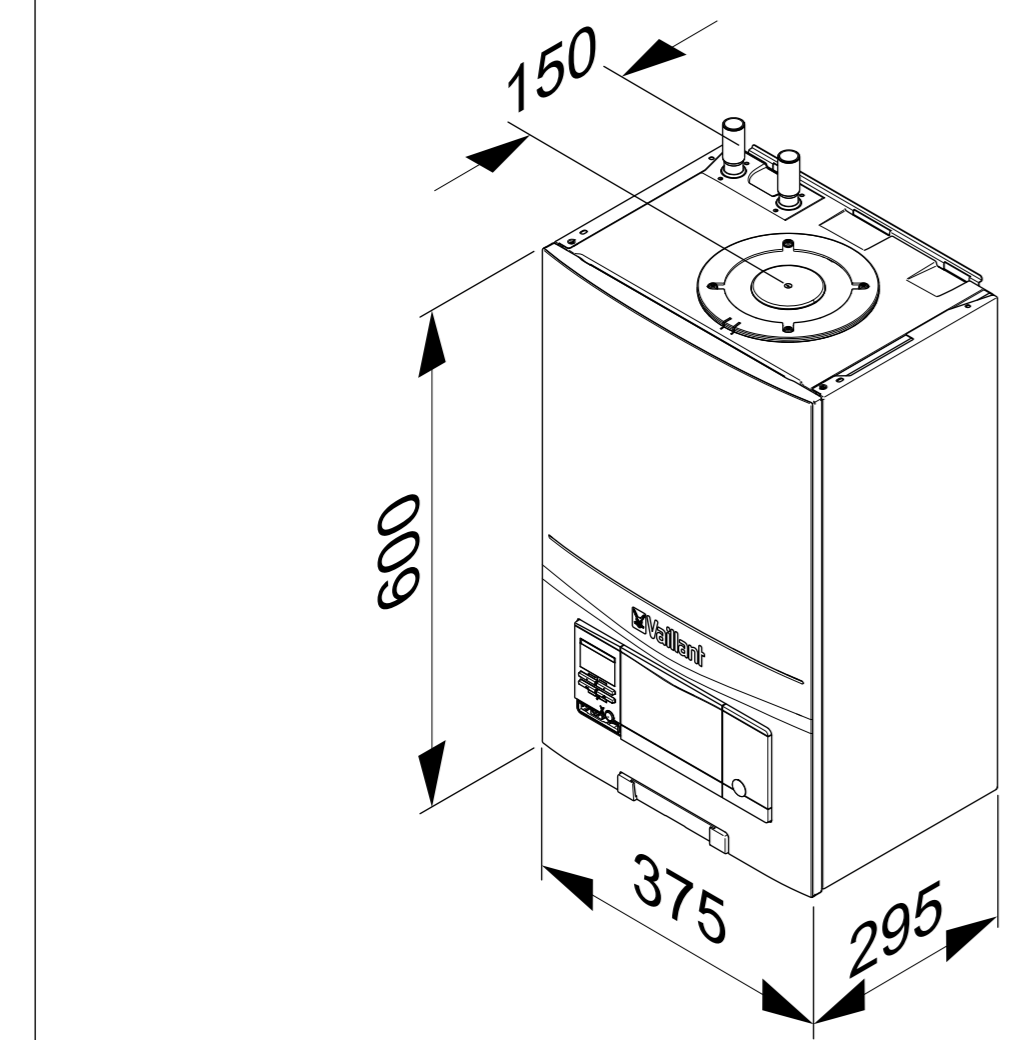

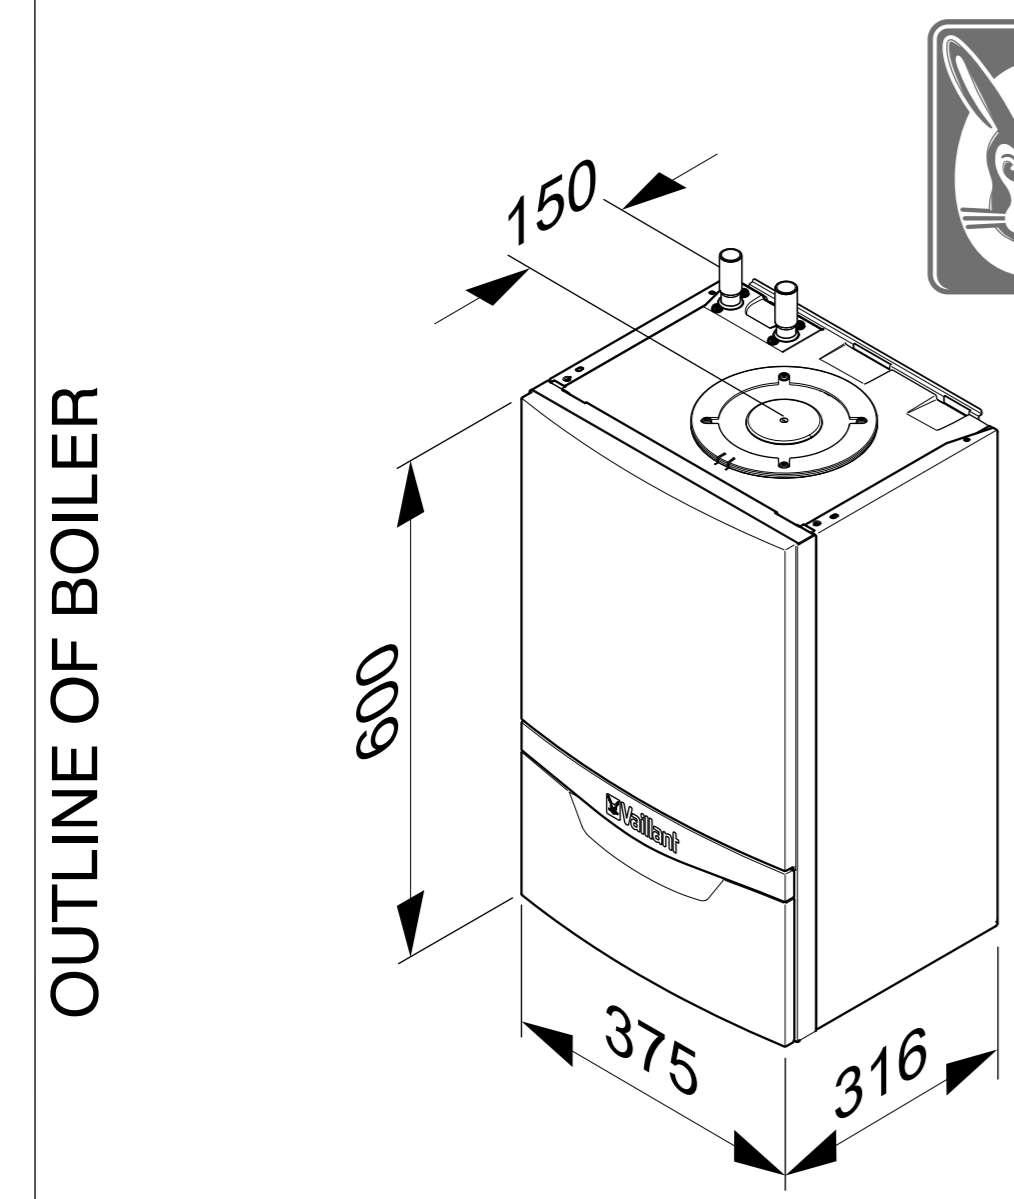

- A - Condensate Connection
- B - Pressure Test Point
- C - Gas Service Cock
- D - Gas Supply Pipe In

Step 4
